

GENERAL CATALOGUE

Pliers

MADE IN GERMANY SINCE 1882

The pliers company

KNIPEX Quality – Made in Germany

KNIPEX – the company behind the pliers.

For over 130 years and four generations, we have been working passionately on being the best manufacturer of pliers for our customers and users – with a clear focus, high demands and a constant flow of new ideas. Throughout the world, our brand enjoys a great deal of trust, and we aim to consistently meet and rebuild this.

Success is important to us, but is not something we look for at any price. We are guided by values, orientate our actions towards sustainability, and face up to our responsibility towards society and the natural environment in which and with which we live. We invest heavily in the efficiency of our location and the qualification of our employees, working today on the success of tomorrow and the day after that – so that we can also continue to be a strong and reliable partner in the future.

Yours, *Ralf Putsch*

Ralf Putsch, Managing Partner.

Spring Hose Clamp Pliers

KNIPEX pliers are different: ideas for more use and performance.

Ever better pliers – that is our guiding principle to which we devote all of our expertise and creativity. We are not satisfied with standard solutions, but rather continuously develop new and improved models that are better to work with and easier to use.

Working in this way means that sometimes we find unconventional solutions to situations, which then go on to set new benchmarks in the industry: novel methods of power transmission, easier and faster handling, combining various functions in a single tool and imaginative problem solvers for special applications. These save our users energy and time, giving them better work results with less effort.

In addition to major innovations, we work continuously on reworking our models in lots of small steps to improve their function, ergonomics and service life.

- 1 Compact force:** CoBolt® XL – two-hand operation for maximum cutting force.
- 2 Easy operation:** Cobra® – fast grip, precise adjustment, hold with self-locking.
- 3 Multifunctional:** electrical installation pliers – six functions in one pair of pliers.
- 4 Universal cutting force:** X-Cut® – the first high leverage diagonal cutters with box joint and precision cutting edges.
- 5 Speed and versatility:** pliers wrench – screws, holds, bends and presses without damaging materials.
- 6 High performance cutting edges:** TwinForce® – high strength thanks to unique transmission.
- 7 End cutting nippers – redefined:** bolt end cutting nippers – light, slim, cut directly on the pivot point.
- 8 Problem-solver:** spring hose clamp pliers – the only pliers for all clamps; apply safely from all angles.

Step by step: from idea to product.

A large number of steps lie between an initial idea and the finished product. We never lose sight of the fact that every new or further development must represent a noticeable improvement for the user. We deploy the most up to date technologies and processes when putting our ideas into practice.

We begin by carefully establishing the requirements and selecting the best concepts. The tool is constructed on a computer, and the function is simulated with the help of special software. This is followed by the first models made on a 3D printer and by milling and extensive tests on steel prototypes – naturally in close dialogue with experienced users. The first products manufactured using series production processes are subjected to further extensive tests – under conditions far more stringent than normal load.

The locking mechanism on the spring hose clamp pliers permit simple and safe work, even with closed clamps. Modern CAD technology simulates the mechanism on the screen.

The image features a man, Filip Marovic, sitting at a white table and holding a red and blue KNIPEX tool handle. He is wearing a light blue button-down shirt. Behind him is a large technical drawing of the tool handle, showing various dimensions and the KNIPEX logo. The drawing includes measurements such as 1.0, 2.0, 10.00, 20.74, 26.34, 26.00, 6.00, 26.14, and 3. The KNIPEX logo is prominently displayed on the handle. The background is a light blue wall with the KNIPEX logo visible on the right side.

Filip Marovic, project manager for KNIPEX Product Development – “It can be seen repeatedly during the development cycles how important even the smallest detail can be. This is the very thing that motivates me to find creative new solutions. During the process we also take new technical possibilities in processing technology and materials into consideration.”

Core qualities: steel – and what we make from it.

You can expect a great deal more from a pair of KNIPEX pliers. This starts with the material. Because the many models of pliers in our range are designed for different requirements and loads, we use steel alloys that have been specially selected for the application and rolled according to our high specifications. Long lasting cutting capability when working with very hard wires, strength when working with high torque loads, and good resistance to corrosion are examples of these targets.

The respective materials are then given their specific molecular structure in a number of coordinated heat treatment steps to produce the optimal relationship between hardness and toughness. These processes allow us to achieve the high degree of reliability, durability and service life that are the very definition of KNIPEX pliers.

Macro image of a cutter after induction hardening. The specially hardened cutter area (light) is in sharp contrast to the softer structure of the body of the pliers (dark).

Handles of the "Alligator®
water pump pliers" being
forged under the hydraulic
double-acting hammer.

This is how our pliers are given their shape: hot and under high pressure.

Forging as a forming process is an old cultural technique and continues to hold fascination today. With an impact of up to five tonnes, the yellow glowing piece of steel is pounded in the upper and lower die at a temperature of 1,250°C. This gives it its basic shape and simultaneously a well-compacted structure.

The production of the forging die in our toolmaking works requires a great deal of experience and high precision, as this raw component will be crucial to the subsequent quality of the pliers. The contours of the forged component are milled at processing centres in the hardened and high strength die block.

Forging die for the high leverage diagonal cutters with forged-in axle.

The technology behind the pliers: machines made by KNIPEX.

All tools can only be as good as the production technology used to manufacture them. In other words, there can be no superior products without advances in production processes.

Due to our specialisation, we can focus on the technologies needed to produce high quality pliers efficiently. We have more than 400 machines, built with the specialised knowledge of generations. We build many of the machines ourselves or adapt machines precisely to our high standards using components we have manufactured. We even programme the software for the control and operation of the machinery ourselves in many cases.

From the product idea to the despatch of the finished pliers to our customers: everything is done under one roof. In this way we can directly influence all steps of value creation ourselves in terms of quality and efficiency, and make continuous improvements. Short paths and direct dialogue simplify coordination of processes and communication between employees.

We ensure our high standards by developing our own processes and machinery.

A wide-angle photograph of a modern industrial factory floor. In the foreground, a worker in a dark blue uniform is operating a large orange robotic arm. The background is filled with complex machinery, conveyor belts, and structural beams, creating a sense of a busy, large-scale manufacturing environment. The lighting is bright and even, highlighting the metallic surfaces and the organized layout of the production area.

Efficiently coordinated
processes and machinery.

Over 45,000 pairs
of different models of
pliers leave our factory
every day.

Only after several test cuts, does a pair of KNIPEX cutting pliers leave our factory.

We take it very literally: 100% reliability.

The precision of pliers is essential for their function: without accuracy there can be no reliable cutting, gripping and shaping, and also no zero backlash. The tight tolerances, which we make sure are complied with through the use of modern production technology, enable us to meet our stringent quality specifications.

We ensure compliance through strict measurements and diverse inspections – both after the various production steps and at the end of the entire process. To do this we use the most up-to-date measurement technology and endurance test plants – as well as the practical component test by hand.

Shape and roughness of the diagonal cutter's cutting edge are precisely measured with an optical 3D measuring system.

More than excellent pliers: what else you can expect from us.

Quality does not stop with the product. Trust, reliability and a collaborative approach define our business relationships – with consistent customer orientation, good service and competent field staff. We provide advice and training, and supply you with extensive digital product data whose format we adapt to your specific requirements. Added to this are diverse possibilities for sales support.

You will not find the breadth and depth of our range with any other manufacturer worldwide – so that your customers can always find the tool they are looking for.

We also present the breadth and depth of our range at in-house exhibitions and open days.

At home in the world: locations in more than 100 countries for you.

KNIPEX is the global pliers brand. We are present in all continents, with a dense network of customers, representatives and branches. In order to be closer still to our retailers and be able to give them even better support, we are further extending our international activities all the time.

There is no substitute for direct contact, which is why we are there for you personally at more than 100 trade fairs each year. On platforms and with the help of the most varied media – classic and digital – we provide comprehensive information about our range and application opportunities in over 30 languages. We reach users and fans throughout the whole world via social media and hundreds of KNIPEX online videos.

We make up to date information available digitally in several languages on all usual channels.

The key factor: our employees.

The most important basis of our success is our employees. Their knowledge and skills, their dedication and their ideas are crucial to our efficiency and thus to our future.

As a company, we are a social community. We want to shape our culture in such a way that allows our employees to participate and identify through their work but also as individuals. We create good conditions for our employees to develop their potential, to obtain further qualifications and to stay healthy. It is also important to us that our employees are able to successfully balance family and career

We invest a significant amount of both expense and care in the training of young people, but also impart a wide spectrum of professional and personal skills to other employees.

Our junior staff obtain their qualifications in our own modern training workshop.

Acting responsibly – sustainable management.

As a company, we believe we share responsibility for our natural environment and the well-being of society. We interact with both in various ways. We consume resources, but take care to use them as carefully as possible, and want to make a contribution to ensuring that they are available to future generations in the same or where possible a better form.

Our ecological objectives include a continuous reduction in our energy consumption, reduction in the volumes of waste and caring for the biodiversity at our site. In addition, we participate in major climate protection projects.

Companies should also be good citizens. We support numerous institutions and organisations from the areas of education and culture. We maintain a close exchange with schools and universities, and strengthen civic engagement in our region in diverse ways.

We support the Bergische music school in the “Singpause” project which, with the help of specially trained teachers, communicates the foundations of music and pleasure at singing together in schools.

High Leverage Combination Pliers

- ▶ 35 % less effort required than with conventional combination pliers
- ▶ With cutting edges (hardness approx. 63 HRC) for heavy duty

- > Easier work due to optimised leverage
- > Easier cutting, powerful gripping, bending and pulling
- > Long cutting edges for thicker cables
- > With gripping zones for flat and round material, suitable for versatile use
- > High-grade special tool steel, forged, multi stage oil-hardened
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 63 HRC

Needle-Nose Combination Pliers

**Small High Leverage Combination Pliers with pointed jaw.
For all common installation and repair work.**

- ▶ Handy use when working in confined areas thanks to slim head design and pointed jaws (anti-twist)
 - ▶ Gripping surfaces with special convex contour on one side for secure gripping of flat parts
 - ▶ Milled groove in the gripping area permits small parts such as nails, pins and bolts to be held and pulled
- > The reliable and diverse combination pliers when out and about
 - > Easy cutting thanks to the high leverage joint
 - > With cutting edges for soft, medium-hard and hard wire
 - > Long service life and stable tips
 - > Forged from special high grade tool steel, manifold oil-hardened
 - > Cutting edges additionally induction-hardened, cutting edge hardness approx. 59 - 63 HRC
 - > DIN ISO 5746

Lineman's Pliers

American style

- ▶ High transmission ratio for easy cutting
- ▶ Requires 50 % less effort compared with conventional combination pliers thanks to optimised transmission ratio
- > Solid construction for heaviest strain; universally applicable
- > Ergonomically optimised handle shape for firm contact to the hand and fatigue reducing operation
- > Particularly effective cross-hatched knurled gripping zone in the jaws – for strong gripping and pulling
- > Additional gripping zone below the joint for powerful leverage and pressing performance
- > With cutting edges for soft and hard wire
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- > Vanadium electric steel, forged, multi stage oil-hardened
- > DIN ISO 5746, ASME B107.20

Pliers for Electrical Installation

The all-rounder for professionals

- ▶ 6 functions in one pair of pliers
- ▶ Multifunctional pliers for the electrical installation; to grip flat and round material, for bending, deburring, cutting cable, stripping and crimping wire ferrules
- > Smooth surfaces near the tips grip single cores without damaging them; serrated gripping surfaces and pipe grip for gripping flat and round material
- > Clear-cut outside edge on the gripping surfaces for working on flush-mounted junction boxes and deburring feed-through holes
- > Stripping holes for conductors of 0.75 - 1.5 mm² and 2.5 mm²
- > Crimping die for wire ferrules 0.5 - 2.5 mm²
- > Cable shears with (induction-hardened) precision cutting edges for copper and aluminium cables up to 5 x 2.5 mm² / dia. 15 mm
- > Slim dimensions for easy access
- > Bolted joint: precise, zero backlash operation of pliers
- > High-grade special tool steel, forged, multi stage oil-hardened

13 96 200 T

- Smooth gripping surface**
for a non-damaging gripping and flattening, round-shaping (form wire loops)
- Profiled gripping surface**
to protect the workpiece, flattened for stronger yet gentle gripping
- Clear-cut outside edge**
for deburring and widening holes
- Pipe grip**
for round parts and cables
- Universal crimp die**
for end sleeves (ferrules) from 0.5 to 2.5 mm²
- Stripping**
for copper conductors from 0.75 to 1.5 and 2.5 mm²
- Shear blade**
for cutting copper cable up to Ø 15 mm (5 x 2.5 mm²)
- 13 91 200 / 13 92 200 / 13 96 200**
in case of models with opening spring integrated in the joint, the activated locking lever keeps the cutting edges closed while other functions remain active; the intelligent latching mechanism enables you to "grip" without opening the pliers. The cutting edge remains closed and protected.

Electricians' Pliers

- > The ideal pliers for cable work
- > For gripping and bending wire
- > For cutting medium hard and hard wire
- > Precision cutting edges additionally induction-hardened, cutting edge hardness approx. 60 HRC
- > With precision stripping holes
- > For crimping wire ferrules
- > Vanadium electric steel, forged, multi stage oil-hardened

Precision Insulation Strippers

with adapted blades

- > Form-fit stripping also of difficult-to-remove insulating materials made of PTFE, silicone, Radox®, Kapton® and rubber; multi-layer too
- > A second pair of blades holds the remaining insulation reliably in place
- > Replaceable shaped blade adapted precisely to the respective conductor cross-section
- > With length stop for constant stripping length during repetitive work
- > Blade: special tool steel, oil-hardened
- > Pliers body: steel

12 12 02

12 12 11

12 12 13

Precise cutting of the insulation to a complete extent

Positive stripping thanks to precise shape of the blades

12 12 02 with cable guide and length stop

12 12 02

- > With additional cable guide for exact positioning of the cable in the stripping area of the blade

12 12 11 / 12 12 12 for solar cable

- > Specially adapted to multilayer and Radox® insulation
- > With additional cable support for a better centring of multi-layer insulated conductors in the stripping profiles

12 12 13 / 12 12 14

- > Especially for cables in accordance with the American specification (AWG)

Maximum cable cross-section (in mm²) per profile:

Radox® is a registered trademark of Huber & Suhner AG
Kapton® is a registered trademark of E. I. du Pont de Nemours and Company

Principle of operation with adapted blades

Properly and precise stripping with an annular cut through the complete insulation. This is particularly important with conductors, which must be stripped precisely.

This works without any problem even with difficult insulating materials made of PTFE, Radox® and multilayer insulations.

Precisely and reliably

Two pairs of blades (1) cut the insulation to a complete extent. Then the blade pairs move apart, and thus the insulation is removed form-fit (2). The pliers open automatically after the stripping procedure.

Insulation Strippers

with adapted blades

- > With replaceable blades for 4 (adapted to diameters) or 6 (adapted to cross-sections) different conductor cross-sections
- > Leave wire undamaged thanks to precision-ground blade shapes, even multi-stranded conductors are stripped gently
- > During stripping, the wire is held firmly by clamping jaws
- > With length stop for constant stripping length during repetitive work
- > A spring leads the stripper back to the starting position
- > Blade: special tool steel, oil-hardened
- > Pliers body: aluminium

12 11 180

KNIPEX MultiStrip 10

Automatic Insulation Stripper

- ▶ Stripping without re-adjustment from 0.03 to 10.0 mm²
 - ▶ Recessed wire cutter
 - ▶ Universal blade geometry -robust and more durable
 - ▶ Ideal grip design with excellent haptics
-
- > Fully automatic adjustment to all single-, multi- and fine-stranded conductors with standard insulation throughout the entire capacity range from 0.03 to 10.0 mm²
 - > No manual fine adjustment necessary
 - > No damage to the conductors
 - > The clamping jaws made of steel hold the cable in a way that prevents slipping without damaging the remaining insulation
 - > With recessed wire cutter for Cu and Al conductors, stranded up to 10 mm² and single wire up to 6 mm²
 - > Particularly smooth-running mechanics and very low weight
 - > Replaceable blades block and length stop
 - > Handle with soft-plastic zone for a steady grip
 - > Body: plastic, fibreglass-reinforced
 - > Blade: special tool steel, oil-hardened

12 42 195

Steel clamping jaws avoid slipping of the cable

Precise stripping from 0.03 to 10 mm² without re-adjustment

Patented mechanics

The incision depth of the stripping blade adjusts fully automatically to the diameter of the wire and accordingly also to the thickness of all standard insulating materials.

There is no need for any manual adjustment which is still necessary when other conventional pliers with a wide wire-stripping range are used.

Wire cutter for multiple stranded wire cables up to 10.0 mm²

Mode of operation of straight cutters

An incision is made in the red area only.

Not suitable for highly-flexible or armoured insulation materials or for multi-layered insulation.

KNIPEX PreciStrip16

Automatically strips insulation – and thanks to additional zero correction, it also grips where automatic devices would otherwise fail

KNIPEX PreciStrip16

Properly stripped away: with deft precision, strip everything from very fine to thick cables with stranded or solid conductors

- ▶ Simple, precise stripping of fine wires and solid round cables with a wide capacity range from 0.08 to 16 mm² with only one pair of pliers
 - ▶ Good grip provided by semi-circular grooved metal holding clamps and exact cut from parabolic stripping blade
 - ▶ A patented automatism regulates the depth of the cut; the neutral point of the automatism can be adjusted in fine steps in special operating conditions (insulation material, temperature)
- > With cable cutter for stranded wire from 0.08 to 16 mm²
 - > With tether attachment point, suitable for KNIPEX Tethered Tools accessories
 - > Inscription area for customisation
 - > With adjustable length stop for precision work repeated accurately each time
 - > Comfortable operation with ergonomic dual-component handle
 - > Easily replaceable blade cassette

12 52 195

Semi-circular grooved holding clamp for better grip that holds practically any insulation material securely in place

For special requirements, such as particularly hard or soft insulation materials, optimum fine adjustments can be made using the adjusting wheel with its tactile locking positions

With cable cutter on the top side for up to 16 mm²

Automatic Insulation Stripper

Work faster: Adjusts automatically to most cable types, with fine adjustment for special materials

- ▶ Strips cables with standard materials without any need for manual adjustment
- ▶ Fine adjustment enables accurate setting of the blades to special materials or temperature requirements
- ▶ Compact, handy and lightweight tool for common cable cross-sections and insulating materials
- > For single, multiple and fine stranded cables of 0.2 up to 6 mm² with standard insulation
- > Narrow head style for use in confined areas
- > With wire cutter for copper and aluminium wires up to 2.5 mm²
- > With adjustable length stop from 6.0 - 18.0 mm for cutting the same stripping lengths during repetitive work
- > Body: plastic, fibreglass-reinforced
- > Blades: special tool steel, oil-hardened, interchangeable

Stripping Pliers

Multifunctional – cutting and stripping with one pair of pliers

- ▶ For time-saving stripping of all round sheathed and damp-proof installation cables (e.g. NYM cable)
 - ▶ Simplified access especially into deep mounted junction boxes thanks to slim head design and optimally angled cable sheath cutter
 - ▶ Strip cables easily and without damage thanks to circular cutting edge with depth limiter
-
- > Suitable for universal use: precision wire stripping holes for conductors from 1.5 and 2.5 mm²
 - > With side cutters for cutting and trimming conductors, wires, small screws and nails
 - > All cutters additionally induction-hardened to approx. 61 HRC for high wear resistance
 - > 30 % lighter than comparable pliers
 - > Vanadium electric steel, forged, multi stage oil-hardened

16 80 175 SB	084129	175	8 - 13		90

Universal Stripping Tool for building and industrial cables

- > With opening spring and locking device
- > For stripping all common round and damp-proof installation cables between 8.0 - 13.0 mm dia. (e.g. 3 x 1.5 mm² up to 5 x 2.5 mm²)
- > Also for use in conduit and distribution boxes
- > Body: plastic, fibreglass-reinforced
- > For use in confined and difficult to access work areas
- > Specially suitable for larger cross-sections and for difficult insulating materials
- > No adjustment of blades to cutting depth required
- > Stripping device for conductors and strands 1.5 mm² and 2.5 mm²
- > Two-way length stop (ideal for right and left-handers)
- > Fastening device on the end of the handle (drop protection system)

KNIPEX ErgoStrip®

Universal Stripping Tool

- ▶ For the fast and precise stripping of all common round and damp-proof installation cables (e.g. NYM cable 3 x 1.5 mm² up to 5 x 2,5 mm²), data cable (e.g. twisted pair) and coax cable
- ▶ Innovative, ergonomic pistol grip design for easy cutting, stripping and longitudinal cut of the sheath
- > Conical, slimmed down tool ends for better access in confined areas
- > Stripping device for cross-sections 0.2 / 0.3 / 0.8 / 1.5 / 2.5 / 4 mm²
- > Simplified insertion of single wires for stripping using location ridges
- > With opening spring and locking device
- > Easy insertion of coax and data cable thanks to opening aid
- > Multi-component design with a soft plastic zone for comfortable use and a secure grip
- > Housing made from stable glass fibre reinforced plastic

16 95 01 SB

- > For right-handers

Long Reach Needle-Nose Pliers

with transverse profiles

Long Reach Needle-Nose Pliers with wave profile

- ▶ For gripping, adjustment and assembly work in hard to reach areas thanks to slim, very long design
- ▶ Deep down situated parts can be easily reached using the slim, half-round tips
- > Careful yet reliable gripping, holding and guiding of small copper pipes, screws and cables as well as other round parts thanks to milled grooves with smooth surfaces
- > Serrated pipe grip to grip round parts
- > Particularly suitable for work in the automotive trade and in mechanical engineering
- > Slim yet robust tool
- > Forged from special tool steel, oil-hardened and tempered
- > DIN ISO 5745

Grip Pliers

- > Hold round, profile and flat material securely
- > Heavy duty model
- > With adjustment screw and release lever
- > One-hand operation
- > High clamping pressure due to toggle lever action
- > Pliers body: rolled steel, high-strength
- > Gripping jaws: chrome vanadium electric steel, forged

Style 0

- > Jaws for round workpieces, with wire cutter

Style 1

- > Jaws with double prism for round, section and flat material

Style 2

- > Straight jaws for flat material

Style 3

- > Long-Nose Grip Pliers, narrow, long jaws

Style 4

- > Long-Nose Grip Pliers, narrow, long jaws;
very suitable for areas that are difficult to reach;
non-serrated gripping area for pinching off hoses

Precision Circlip Pliers

for internal circlips in bore holes

► Heavy duty in continuous operation: up to 10 times longer service life compared to turned tips

► With inserted tips for reliable work

- > Bolted joint: precise, zero backlash operation of pliers
- > Non-slip plastic coating on the handles
- > Inserted tips: spring steel wire, drawn
- > Pliers body: chrome vanadium electric steel, forged, oil-hardened

48 11 J2

48 21 J21

Style 1

> DIN 5256 C, straight tips

Style 2

> DIN 5256 D; 90° angled tips

High precision quality

Easy and reliable assembly: form-fitting inserted and pressed-in tips made of high-density spring steel offer a high level of protection against excessive stress and strain, e.g. when removing stuck rings. The large supporting surfaces and the position of the tips make it more difficult for the rings to bounce off.

KNIPEX circlip pliers with overexpansion guard

For the standardized fitting of circlips in the industrial serial production. Particularly manufacturers of sensitive, safety-relevant components (e.g. brakes or gears) highly appreciate the compliance of DIN 471 and 472. The mounting of circlip rings in this case requires pliers with overexpansion guard or a cone. KNIPEX Circlip Pliers with overexpansion guard meet the requirements and furthermore offer a superior durability.

Sturdy, inserted tips: made from high-density spring steel

Tight fit through compression

Precision Circlip Pliers

for external circlips on shafts

► Heavy duty in continuous operation: up to 10 times longer service life compared to turned tips

► With inserted tips for reliable work

- > Large contact faces on the tips: no distortion of circlips, easy fitting
- > Bolted joint: precise, zero backlash operation of pliers
- > Internal opening spring, protected and captive
- > Non-slip plastic coating on the handles
- > Precise, smoothly-operating screw joint
- > Slim head style allows use in confined areas
- > Handles with non-slip plastic coating
- > Inserted tips: spring steel wire, drawn
- > Pliers body: chrome vanadium electric steel, forged, oil-hardened

Style 1

> DIN 5254 A; straight tips

Style 2

Circlip Tool

for internal and external circlips up to 1,000 mm nominal size

- > Universally usable for large circlips with diameters of 400 - 1000 mm
- > Reliable opening and closing of the circlips and holding by self-locking precision spindle drive
- > For fitting and removing circlips
- > Circlips are reliably caught thanks to short, direct attachment
- > Replaceable tips having working ends with diameters of 6 and 9 mm, for perfect adaption to the handling bores in the circlips
- > Optional operation by hand, with Allen key, ratchet wrench or cordless screwdriver
- > Areas of application are heavy engines where very high forces and torques are transmitted with large shafts and bearings , e.g. wind turbines, tidal power stations, generator construction, hydropower stations, large machine construction (rolling mills, presses), shipbuilding, aerospace
- > Tool in a plastic case with foam insert
- > Tip material: chrome-vanadium electric steel

Circlip Pliers

for grip rings on shafts

- > For fitting grip rings on shafts from 1.5 - 30 mm dia.
- > With opening spring
- > Solid style, forged
- > Non-slip, solid tips
- > Pliers body and tips: chrome vanadium steel, forged, oil-hardened

46 11 G0

- > For rings of 1.5 - 4.0 mm dia., with adjustable stop screw to prevent overstretching

High Leverage Concreters' Nippers

high lever transmission

- ▶ 25 % less effort required compared to conventional concreters' nippers of the same size
- ▶ Extra-slim form for tying deep mounted steel rods
- > To lace concrete reinforcing steel with binding wire from a roll
- > Wire is twisted and cut in a single pass
- > High-leverage joint, minimising strain, even when thick binding wires are used
- > The high damping of the cutting stroke on cutting through the binding wire reduces the strain on tendons and muscles
- > Cutting edges additionally hardened; cutting edge hardness approx. 61 HRC
- > High-grade special tool steel, forged, multi stage oil-hardened
- > DIN ISO 9242

High Leverage Flush Cutter

for soft metal and plastic

- > For the flush cutting of soft materials, e.g. plastic, aluminium, copper, lead
- > Permits the energy-saving cutting of thick work components made of soft metal and plastic
- > 20° angled head with single-sided joint bar and diagonal cutting edge for flush cutting; with space for gripping
- > Opening spring and locking device are integrated in the handles also for comfortable work and protected transport
- > Precision cutting edges for soft material
- > Cutting edges additionally hardened; cutting edge hardness approx. 59 HRC
- > Chrome vanadium electric steel, forged, multi stage oil-hardened

Clean, flush cutting of copper conductor rails

Ideal for the flush cutting plastic sprues with large diameters

KNIPEX WORLD OF DIAGONAL CUTTERS

With four tailor-made diagonal cutters, KNIPEX provides solutions for every application. An extraordinary variety ensures an excellent response from the "KNIPEX World of diagonal cutters" to whatsoever specification.

KNIPEX-Diagonal Cutter

The classic model. The indispensable cutting tool for versatile use.

KNIPEX-High Leverage Diagonal Cutter

The robust. For very tough, continuous use.

KNIPEX X-Cut®

The all-rounder. Compact and light. Powerful and precise.

KNIPEX TwinForce®

The superior model. For comfortable cutting, repetitive cutting or extremely hard cutting jobs.

TwinForce®

The reapplying cutter

Double-hinged design

Hand force is multiplied by 39

Diagonal Cutter

Long cutting edges for cutting cable; also precise enough for the finest stranded wires
Hand force is multiplied by 12

High Leverage Diagonal Cutter

Forged on hinged joint for robust use
Hand force is multiplied by 13

X-Cut®

Box joint:
greatest stability with little weight
Hand force is multiplied by 16

16 Kg
with
reapplication*

33 Kg

30 Kg

40 Kg

Required hand
force for a nail
with Ø 3 mm

* notch – reapply – cut through

KNIPEX TwinForce® 180 mm

Diagonal Cutter 180 mm

KNIPEX X-Cut® 160 mm

Diagonal Cutter 160 mm

Diagonal Cutters

- > The indispensable diagonal cutter for all-round use
- > High-quality material and precise workmanship for long service life
- > Precision cutting edges for soft and hard wire
- > Clean cutting of thin copper wires, also at the cutting edge tips
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 62 HRC
- > Narrow head style for use in confined areas
- > Vanadium electric steel, forged, multi stage oil-hardened
- > DIN ISO 5749

KNIPEX X-Cut®

Compact Diagonal Cutters high lever transmission

- ▶ Cuts finest strands as well as multi-core cables and piano wires
- ▶ Powerful, light and universal
- > High cutting performance with minimum effort due to optimum co-ordination of the cutting edge angle and transmission ratio
- > Box-joint design: highest stability with low weight
- > Doubly supported joint axis for heavy duty
- > Large opening width for thicker cables
- > Cuts precisely, even through fine copper wires
- > Compact, low-weight construction
- > Universally usable, in the assembly, maintenance and production
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened
- > Precision cutting edges additionally induction-hardened, cutting edge hardness approx. 62 HRC
- > DIN ISO 5749

High Leverage Diagonal Cutters

- > For very tough, continuous use
- > High cutting performance with minimum effort due to optimum co-ordination of the cutting edge angle and transmission ratio
- > Precision cutting edges additionally induction-hardened (cutting edge hardness approx. 64 HRC), for all sorts of wire including piano wire
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened
- > DIN ISO 5749

Style 1

- > With opening spring; to be activated if required

Style 2

- > 12° angled head offers clearance for gripping

Length 250 mm

- > The 250-mm-long diagonal cutter is suitable for copper conductors up to 16 mm² and aluminium conductors up to 35 mm²

KNIPEX TwinForce®

High Performance Diagonal Cutters

► The superior High-Leverage Diagonal Cutter with patented double joint

- > Ideal transmission of force due to double-hinged design
- > Reliably cuts all types of wire, including steel tape
- > For rough or very fine cutting
- > Low cutting impact: gentle on hands. The tension on muscles and tendons is relieved
- > For comfortable cutting, repetitive cutting or extremely hard cutting jobs
- > High degree of stability and zero-backlash due to precisely milled forged-in axles
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened
- > Precision cutting edges additionally induction-hardened, cutting edge hardness approx. 63 – 64,5 HRC
- > DIN ISO 5749

73 72 180 F

> With opening spring to simplify reapplication and for repetitive cutting

73 71 180

73 72 180

73 72 180 F

The high performance diagonal cutters with opening spring for easier reapplication and for heavy use

The opening spring can be easily activated and deactivated by a press of the thumb

Cuts again 50% easier than the tried and tested KNIPEX high leverage diagonal cutters

The option to reapply the tool. The KNIPEX TwinForce® cuts even 4 mm thick wire without great effort when reapplied two or three times.

Conventional high leverage diagonal cutters either cannot cut these diameters or only with very great effort.

KNIPEX TwinForce® Reapplying

Insert the wires as close to the hinge as possible. In case of cutters with very high transmission, the width of the gap between the cutting edges close to the fulcrum may be less than the thickness of the wire. Wires may slip forward when the cutting starts.

First make a notch in the wire using the KNIPEX TwinForce® until the required hand force increases considerably. Now open the pliers and slide the wire backwards towards the joint. Hold the cutting edge in the notches you have made in step 1.

Continue cutting in the same location along the wire. Now cutting is much more easier because the wire remains in place closer to the fulcrum.

You can repeat this process if necessary.

KNIPEX CoBolt® S

Compact and powerful

In a handy length of 160 mm

KNIPEX CoBolt® S

Compact Bolt Cutters

► Specially suitable for small hands

- > Precision cutting edges for soft and hard wire as well as piano wire
- > Cuts components such as bolts, nails, rivets etc. up to Ø 4.4 mm
- > Extremely high cutting capacity with little effort required due to extremely effective joint design
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- > The microstructure on cutters keeps the material to be cut in a good insertion position: makes optimal use of the mechanics
- > With gripping surface below the joint for gripping and pulling wires from Ø 1.0 mm
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened

71 01 160

71 31 160

KNIPEX CoBolt®

Compact Bolt Cutters

Clever muscle man

- > With precision cutting edges for soft, hard and piano wire
- > Cuts bolts, nails, rivets, etc. up to 5.2 mm dia.
- > Efficient joint design ensures exceptional cutting performance with little effort
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened
- > DIN ISO 5743

- ▶ Micro-structured cutting edge reduces slipping of the material from the jaws
- ▶ With gripping surface below the joint for gripping and pulling wires with a diameter as from 1 mm

71 12 200

opening spring and locking device are integrated in the handles also for comfortable work and protected transport

71 02 200 T*

Pliers with tether attachment point for mounting a fall protection

Micro-structured cutting edge allows easy cutting of large cross-sections

With gripping surface below the joint for gripping and pulling wires with a diameter as from 1 mm

Opening spring and locking device are integrated in the handles also for comfortable work and protected transport

CoBolt®

60% less effort

required compared to conventional high-leverage diagonal cutters. The ingenious lever-action mechanism ensures an extremely favourable lever ratio with very little friction. The cutting force is about 30 times higher than the hand force applied.

KNIPEX CoBolt® XL

Compact Bolt Cutters

The compact bolt cutters from KNIPEX now also available with long handles for one and two-hand operation. Up to a 40-fold increase of manual force.

- ▶ For powerful cutting of larger cross-sections as well as very hard materials
- ▶ Two-hand operation for maximum cutting force
- > 60 % less effort required compared to conventional high-leverage diagonal cutters
- > 40-fold increase of manual force due to special joint design
- > With gripping surface below the joint for gripping and pulling wires from Ø 1.0 mm
- > Induction-hardened precision blades: cutting edge hardness approx. 64 HRC
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened

71 01 250

- > Straight cutting edges

71 31 250

- > Blades with recess for easier cutting of larger cross-sections thanks to better leverage close to the fulcrum

71 01 250

71 31 250

Two-hand operation for maximum cutting force

Bolt Cutters

Cuts hard components up to 48 HRC

- > Cutting capacity up to 48 HRC hardness
- > Robust cutting edges are additionally induction-hardened, cutting edge hardness approx. 62 HRC
- > Forged-in stopper with comfortable shock-absorber
- > Good access due to very flat construction of head and joint area
- > Ergonomically angled handles to minimise effort
- > Sturdy non-slip two-colour dual component handle sleeves
- > Precise adjustment (12 positions) by eccentric bolt
- > High cutting performance with minimum effort due to optimum co-ordination of the cutting edge angle and transmission ratio
- > Bolted cutter head, replaceable
- > Joint: special tool steel, forged
- > Handles: steel tube, powder-coated
- > Blade: chrome vanadium heavy-duty steel, forged, multi stage oil-hardened

Forged-in stopper with damping inserts: cushions the cutting stroke comfortably

Bolt End Cutting Nippers

high lever transmission

► Powerful, compact, comfortable

- > Better handling, geater capacity and lower handforce required compared to conventional bolt end cutting nippers
- > With cutting edges for soft, hard and piano wire
- > Particularly high cutting capacity with minimum effort due to optimum transmission ratio
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- > Handles angled for better accessibility
- > Vanadium electric steel, forged, multi stage oil-hardened

61 02 200

- > With slim multi-component grips without collar for better handling and easier transport; with large contact surface on the handles for better allotment of pressure and more comfort at work

61 01 200

61 02 200

Extraordinary cutting performance: also for piano wire

Particularly efficient for fence construction

Almost flush cutting of bolts, nails etc.

Pliers Wrenches

Pliers and a wrench in a single tool

- ▶ Replaces the need for sets of metric and imperial spanners
- ▶ Smooth jaws for damage free installation of plated fittings – working directly on chrome!
- > Adjustable tightening tool
- > Also excellent for gripping, holding, pressing and bending workpieces
- > Push the button for adjustment on the workpiece
- > Zero backlash jaw pressure prevents damage to edges of sensitive components
- > Parallel jaws give a more solid grip; its design allows flexible adjustment of all widths up to the specified maximum size
- > Reliable catching of the hinge bolt: no unintentional shifting
- > The ratchet type principle allows quick and easy tightening and release of all bolted connections
- > Lever transmission greater than 10 : 1 for strong gripping power
- > Fast adjustment by pushing a button directly on the workpiece
- > No unintentional shift of the gripping jaws and no slipping of the joint
- > Replaces the need for sets of metric and imperial spanners
- > Chrome vanadium electric steel, forged, oil-hardened

Length 150 mm

- > Ideal multi-purpose wrench in pocket size; indispensable companion in emergency tool kit

Length 180 mm

- > With narrow gripping jaws – for tightening situations that require a slim tool

86 01 180 / 86 01 250 / / 86 01 300 / 86 02 180 / 86 02 250 / 86 03 250 / 86 05 250 / 86 06 250

Conventional open end wrench: edge pressure causes surface damage

Pliers wrench: zero backlash contact pressure, no damage to edges

The smooth jaws grip all parallel surfaces in the capacity range with a high degree of pressure if necessary and open up almost unlimited application possibilities for the pliers wrench: e.g. for tightening locknuts, exerting pressure to activate the adhesive power of contact adhesives, edge breaking in tile work, snapping cable ties, utilisation as a small vice.

Working on plated fittings without damage of the surface

Replaces the need for sets of metric and imperial spanners

Ideal for bending operations

The mini pliers wrench for precision mechanics

Opening width lasered onto the pliers head (metric on the front and imperial on the back)

Fast adjustment at the touch of a button

Multiple Slip Joint Spanner

- > For metric and imperial nuts and screws with widths across flats from 10 to 32 mm (3/8" up to 1 1/4"); self-locking from 17 mm: no slipping on the workpiece
- > Zero-backlash gripping of metric or imperial hexagonal headed screws, no rounding of bolt heads
- > Reliable and tight gripping of rounded, rusty, or thick coated bolts and screws
- > Ideal for work on vehicle brake systems
- > Quick tightening of bolted connections using ratchet action
- > Push the button for adjustment on the workpiece, also possible with one hand only
- > Fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- > Box-joint design for high stability due to double guide
- > Reliable catching of the hinge bolt: no unintentional shifting
- > Favourable lever action: optimum transmission of force
- > Pinch guard prevents operators' fingers being pinched
- > Replaces a set of wrenches, ideal for tightening locknuts
- > Chrome vanadium electric steel, forged, multi stage oil-hardened

87 41 250

Self-locking: no slip on workpieces; less effort required

In operation on rusted nut with rounded edges

The Raptor Pliers combines the convenience of the comfortable push-button adjustment on the workpiece and the function of an all-purpose tightening tool. Jaw gripping with zero backlash prevents slipping on the bolt head or rounding edges. Even rusty or thick coated bolted connections which have no surfaces capable of being gripped reliably by a conventional spanner can be managed by the exceptionally powerful closing gripping jaws of this spanner.

KNIPEX SmartGrip®

Water Pump Pliers with automatic adjustment

- > Ideal for frequent changeovers to workpieces of different sizes
- > Automatic adjustment per one-hand operation both for right-handed and left-handed use
- > Good access to the workpiece thanks to the slim dimensions of head and joint area and flush joint bolt
- > Self-locking on pipes and nuts: no slipping on the workpiece and low handforce required
- > Gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: high wear resistance and stable gripping
- > Box-joint design for high stability due to double guide
- > Pinch guard prevents operators' fingers being pinched
- > Locking lever for space saving transport with reliable closed handles
- > Chrome vanadium electric steel, forged, multi stage oil-hardened
- > DIN ISO 8976

KNIPEX Cobra® XL / XXL

Water Pump Pliers

- > Greater gripping capacity but much lower weight than comparable pipe wrenches
- > Fast push-button adjustment directly on the workpiece, no unintentional slipping of the joint
- > Fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- > Self-locking on pipes and nuts: no slipping on the workpiece and low handforce required
- > Gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: high wear resistance and stable gripping
- > Box-joint design for high stability due to double guide
- > Pinch guard prevents operators' fingers being pinched
- > Chrome vanadium electric steel, forged, multi stage oil-hardened
- > DIN ISO 8976

87 01 400

87 01 560

KNIPEX Cobra® XL
length 400 mm – weight 1195 g

gripping a union nut of a 2" pipe fitting
large gripping capacity of 95 mm,
would require a 3-inch pipe wrench

smaller dimensions and less weight than 1 1/2" pipe wrenches

2" pipe wrench
length 560 mm – weight 2670 g

gripping the 2" union nut exceeds the capacity of a 2" pipe wrench; no confident working conditions

KNIPEX Cobra® QuickSet

Hightech Water Pump Pliers

- ▶ Fully open, push, grab!
- ▶ Additional fast adjustment on the workpiece by sliding the pliers handle
- > Combines the proven, reliable locking of the hinge bolt with an additional push function which makes it easier to work in very confined and inaccessible areas
- > The adjustment directly on the workpiece is possible by simply sliding the pliers handle
- > Reliable locking of the hinge bolt with the first workload. The gripping width of the pliers is then fixed and can only be adjusted by pressing the button
- > To re-activate the sliding function, the hinge bolt must be released by pressing the push button and the pliers must be completely opened again
- > Chrome vanadium electric steel, forged, multi stage oil-hardened
- > DIN ISO 8976

87 21 250

87 22 250

The KNIPEX Cobra® QuickSet combines all proven properties of the KNIPEX Cobra® with an additional push on function which makes it easier to work in very confined and inaccessible areas.

Adjustment directly on the workpiece is possible by simply sliding the pliers handle. The hinge bolt locks itself with the first workload. The gripping width of the pliers is then fixed and can only be adjusted by pressing the button. The hinge bolt must be released by pressing the button and the pliers must be completely opened once to activate the QuickSet function again.

Press the button – open pliers completely

Position jaw – simply slide and close pliers

Hinge bolt locks itself with the first workload

KNIPEX Cobra® ES

Water Pump Pliers extra-slim

- > Ideal for service, maintenance and equipment repair, in automotive and general industry
- > Long, narrow jaws
- > Particularly good access to the workpiece due to very slim construction of head and joint area
- > Firm grip also on flat material due to three-point rest
- > Push the button for adjustment on the workpiece
- > Fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- > Self-locking on pipes and nuts: no slipping on the workpiece and low handforce required
- > Box-joint design for high stability due to double guide
- > Reliable catching of the hinge bolt: no unintentional shifting
- > Favourable lever action: optimum transmission of force
- > Pinch guard prevents operators' fingers being pinched
- > Chrome vanadium electric steel, forged, multi stage oil-hardened
- > DIN ISO 8976

Grips nuts up to 34 mm (1 5/8") across flats

Optimum access to the workpiece. Ideal for service, maintenance and equipment repair, in automotive and general industry

Very slim design in the complete head and joint area (compared to conventional water pump pliers)

Ear Clamp Pliers

Suitable for universal use, for 1-ear and 2-ear clamps

- > For the simple and reliable mounting of 1-ear and 2-ear clamps (Oetiker system or similar)
- > No damage to press points on the ear clamps
- > The slim head permits good accessibility in confined areas
- > Versatile use for clamps on CV boots, cooler and fuel lines, air pressure systems, compressors
- > Durable and strong
- > High-grade special tool steel, forged, oil-hardened

10 99 1220

- > Especially suitable for universal use thanks to the additional side jaw

10 98 1220

10 99 1220

Sealing the fluid hose on the connecting piece using the side press nib

Using the front press nib

Sealing the pneumatic hose on the quick action coupling

KNIPEX TwistCut®

Corrugated pipe cutters

- > For corrugated plastic pipes from Ø 13 - 32 mm and a ridge width of up to 2.7 mm
- > For cutting empty or ready-assembled corrugated pipes to length
- > Application in the electrical and construction trades and for plumbing work
- > Recessed blades prevent injuries
- > Exact, flush cut, without damaging the internal cables
- > Cut on the outside of fluting – no sharp raw edge inside the corrugated pipe
- > Fast and reliable work
- > Simple insertion of the corrugated pipe for reliable and simple cutting: no waste
- > In the case of thick-walled corrugated pipes, reapply after the circular cut just behind the cut, and break off the corrugated pipe
- > Slim and ergonomically shaped for work in poorly accessible areas
- > Double-sided guide for a precise cut
- > For corrugated pipes with Ø of 13 - 32 mm
- > Body made of stable polyamide compound plastic

90 22 01 SB

90 22 02 SB

Convenient handling due to fastener with locking device and opening by means of internal spring

Also for protective pipes on aluminium composite pipes in plumbing, up to a diameter of 32 mm

Clean cutting edge with no damage to internal cables as the cut is always at the top of the corrugation

Easy to use: press KNIPEX TwistCut® together, turn with slight pressure, done

90 22 02 SB: Practical locator simplifies the insertion of single conductors for stripping

90 22 02 SB: Injection moulded length scale for consistent stripping to a uniform length, legible for left and right handed users

KNIPEX TubiX® Pipe Cutter

With one hand only: cuts copper, brass or stainless steel quickly and easily

- ▶ QuickLock single-handed quick adjustment: slide on, cut – finished!
 - ▶ Easy one-handed pushing for quick adjustment to different tube sizes
 - ▶ Comfortable and easy working thanks to high-quality needle bearings in the cutting wheel and the guide rolls
- > Cuts pipes from Ø 6 - 35 mm (1/4" - 1 3/8") with wall thickness up to 2 mm
- > Cutting wheel made of high-grade ball-bearing steel
- > Practical quick replace system for the cutting wheel – with spare wheel stored under the feeding barrel
- > With precision-ground deburring tool, easy to remove
- > Light and durable metal enclosure of magnesium

← The overall length does not change during operation →

90 31 02

PAT. PEND.

The needle-bearing and spring-loaded cutting wheel made of high-quality ball bearing steel is easily exchangeable

The spring-loaded cutting wheel can be pushed and fixed on the diameter of the pipe with the single-handed quick adjustment

Speed in everyday operation: the QuickLock single-handed quick adjustment enables the cutting wheel to slide onto any pipe diameter with a single press of the thumb

High-quality needle bearings enable the cutting wheel and the four guide rollers to operate virtually without any friction during the cutting – cuts stainless steel pipes with particular ease

Four steps to success – how the KNIPEX TubiX® pipe cutter helps you in your work

1 Cutting now made easy: position the opened KNIPEX TubiX®...

2 Push the cutting wheel against the pipe with the QuickLock single hand quick adjustment: fastest adjustment to different pipe diameters

3 Tighten and cut with a swift twist and then readjust using the ergonomic blue feeding barrel...

4 and you're done! If necessary, have the edge smoothed out using the fold-out deburring tool – with surprisingly little effort

ACSR Cable Cutter	155
Cable Cutters (ratchet action)	156
Bowden Cable Cutter	160
Wire Rope and ACSR-Cable Cutters	161

KNIPEX StepCut

Additionally hardened blades, precision-ground:
lighter, cleaner cut without crushing

KNIPEX StepCut

Cable cutting made easy: innovative step cutting separates wires one by one to save energy

- ▶ Small, light, strong: comfortable cutting without crushing and just 160 mm in size
 - ▶ Noticeably less effort: the gradations cut wires one after the other; cutting is up to 40 % easier than with standard cable shears of the same length!
 - ▶ Ergonomic handle design: optimal cutting feel even for larger cable diameters
- > Cuts multi-core stranded copper and aluminium cables up to Ø 15 mm (50 mm²)
 - > Cuts solid copper and aluminium cables up to 5 x 4 mm²
 - > Cuts without crushing
 - > Bolted joint: precise, effortless, durable
 - > Pinch guard fitted for safe work
 - > Not suitable for steel wire and hard drawn copper conductors
 - > Long lifetime: high-grade special tool steel, forged, oil-hardened, cutting additionally induction-hardened

Cable Shears

with twin cutting edge

- > For cutting copper and aluminium cables
- > Not suitable for steel wire and hard drawn copper conductors
- > Precision-ground, hardened blades
- > Clean and smooth cut without crushing and deformation
- > By dividing the cutting actions into initial cut (insulating sheath in the front cutting area) and final cut (conductor in the back cutting area), cables up to Ø 20 mm can be cut in one-hand operation
- > Low handforce required due to favourable lever ratio and special blade geometry
- > Pinch guard prevents operators' fingers being pinched
- > Adjustable bolted joint, self-retaining screw
- > High-grade special tool steel, forged, oil-hardened

Initial cut: using the front cutting edge to cut the insulating sheath on larger cable diameters leaves an ergonomic handle opening width.

Final cut: after cutting the sheath in the front profile the conductors in the rear part are cut. Initial cut in the front profile, final cut in the rear profile - to keep it as easy as possible.

95 11 200

95 12 200

95 16 200

95 17 200

The twin cutting edge allows a comfortable handle position in all cutting situations within the specified cutting capacity.

ACSR Cable Cutter

(ratchet action)

for cables with a steel core

- ▶ Handy. Compact. Sturdy.
- ▶ Extremely robust design.

- > Cuts through aluminium conductor cable with steel core up to a diameter of 32 mm in one or two-handed operation
- > Cutters with precision cut and induction-hardened cutting edge
- > Two-stage ratchet drive for easy cutting
- > Less physical effort due to very high transmission ratio
- > Fixed handle with support area for putting down the pliers when cutting
- > Locking mechanism for transporting with safely closed handles
- > Special high grade tool steel, multi stage oil-hardened

95 32 340 SR

Enormous power with a weight of just 1300 g

The strong "flange" on the handle can be used as a practical support surface when cutting larger diameters

Cable Cutters

(ratchet principle, 3-stage)

- ▶ Sturdy. Easy to use. Stable.
 - ▶ Innovative ratchet-drive.
 - ▶ For cable up to 60 mm diameter.
- > Fixed handle with support area for putting down the pliers when cutting
 - > Easy handling due to low weight (825 g) and compact construction (320 mm length) – also usable in confined areas
 - > Cutting through copper and aluminium cables with diameters of up to 60 mm in one-hand and two-hand operation
 - > Hardened cutting edges, precisely ground, cut smoothly and neatly without crushing
 - > For cutting copper and aluminium single conductors as well as multiple stranded cables (not suitable for steel wire and wire ropes)
 - > Innovative three-stage ratchet-drive with high leverage for easy cutting in one-hand and two-hand operation
 - > High-grade special tool steel, forged, oil-hardened

95 32 320

95 36 320

The innovative three gear drive permits three operating modes

- > Fast working with full lift of handles and one-handed operation when cutting through insulation material
- > Powerfully sliding the sickle knife forward when cutting through the stranded conductor with two hand through use of the central lifting area (handling opening of between 1/3 and 2/3)
- > Powerfully pushing the sickle knife forward with one hand to cut through the stranded conductor through use of the first third of the handle lift with one or two hands

First manual ratchet-action cable cutter for one-hand and two-hand operation for cutting copper and aluminium cables with diameters of up to 60 mm!

Cable Cutters

(ratchet action)

for steel wire armoured cables (SWA cable)

- ▶ Cuts through steel wire armoured cables with a diameter of up to 45 mm / 380 mm² (e.g. 4 x 95 mm²) using one or two-handed operation
- ▶ Sturdy. Easy to use. Stable.
- > Simple handling due to low weight (800 g) and compact design (315 mm length) – can also be used in confined areas
- > Precision-ground blades and induction-hardened cutting edges cut smoothly and neatly without crushing
- > Innovative high leverage three-stage ratchet-drive
- > Support area for putting down the pliers when cutting
- > Not suitable for cutting ACSR cable and wire rope!
- > Cutter head: special high-grade tool steel, forged, oil-hardened

Cable Shears

(ratchet action)

with telescopic handles

- ▶ Cable shears with adjustable telescopic handles allowing angular positioning
- > For cable diameters up to 38 mm, handles can be positioned at an angle to set the optimum handle width, which makes the shear also suitable for work in confined areas
- > Comfortable work thanks to ratchet action and low weight
- > Heavy duty telescopic handles made of oval aluminium tubing; extendable up to 770 mm for maximum leverage on large cable diameters; retractable down to 570 mm for minimum space requirements during transport
- > Replaceable cutting head
- > Extensive cutting range up to max. Ø 38 mm or max. 280 mm² (e.g. 4 x 70 mm² NYY) in copper and aluminium cables
- > Easier, neater cut due to optimised cutting edge geometry
- > Adjustable bolted joint
- > Handles: high-strength oval aluminium tubing
- > Cutting head: special quality high-grade tool steel, oil-hardened

95 32 038

Handles adjustable in length and angular position for easier work: set the handle length to the optimum lever for powerful cutting; put the handles at an angle for a comfortable gripping position

Cable Cutters

(ratchet action)

with telescopic handles

- > For copper and aluminium single conductors as well as multiple stranded cables – also with hard rubber or plastic sheath
- > Not suitable for steel wire and wire ropes
- > Also suitable for cables with iron sheath reinforcement
- > Little hand force required for cutting due to optimum transmission ratio
- > High cutting capacity due to two-hand operation and ratchet action
- > The blade can be opened in any cutting position
- > Handle length with multiple position adjustment from 400 - 610 mm (short transport length, individual adaptation to working conditions)
- > Blade: special-quality high-grade tool steel, oil-hardened
- > Handles: high-strength oval aluminium tubing

Wire Rope Cutters

forged

Double function: neat cutting, precise crimping

- > With two crimping dies for end caps on Bowden cable sheaths and end ferrules for traction cables
- > Comfortable work thanks to handy, slim design and internal opening spring
- > Bolted joint for precise blade guidance, re-adjustable
- > High leverage for reduced effort
- > Cutting edge hardness approx. 64 HRC
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened

KNIPEX MultiCrimp®

Crimping Pliers with changer magazine

- > Just one tool for the most common crimping applications
- > Crimping dies changed quickly and easily without any additional tool
- > Sorted and protected storage of the interchangeable dies in a round magazine
- > Comfortable, powerful crimping pliers in professional quality
- > Same reliable crimping results as with fixed crimping dies
- > Consistently high crimping quality thanks to precision dies and forced locking mechanism (unlockable)
- > Chrome vanadium electric steel in special quality, oil-hardened
- > Round magazine: plastic, fibreglass-reinforced

97 33 01

- > Crimping pliers with round magazine and three interchangeable crimping dies for non-insulated open plug type connectors (4.8 + 6.3 mm width) from 0.5 - 6.0 mm²; for insulated terminals, plug connectors and butt connectors from 0.5 - 6.0 mm² and for insulated and non-insulated wire end sleeves from 0.25 - 6.0 mm²

97 33 02

- > Crimping pliers with round magazine and five interchangeable dies for non-insulated open plug type connectors (plug width 4.8 + 6.3 mm) from 0.5 - 6 mm²; for insulated terminals, plug connectors and butt connectors from 0.5 - 6 mm²; for insulated and non-insulated end sleeves (ferrules) from 0.25 - 6 mm²; for insulated and non-insulated wire end sleeves with 10 / 16 / 25 mm² and for non-insulated crimp terminals, tube and compression cable lugs in accordance with DIN 46234 and DIN 46235 and non-insulated crimp, butt and press connectors in accordance with DIN 46341 and DIN 46267

97 33 01

97 33 02

Compact, inexpensive and light-weight crimping pliers for fitting and repairs. The electrician needs only one tool now instead of five as before.

Changing position: service lever opens out for parallel jaw positioning

Changing the crimping dies: unlock the magazine position, take out the set of dies which the pliers have been pushed on

Fold in the service lever and press the pliers – ready for use again

Magazine for crimping dies can be carried on a belt

Clearly visible marking on the crimping dies with pictograms

KNIPEX eCrimp

Electromechanical Crimp System Pliers for exchangeable crimping dies

- > Strong electromechanical drive, no hydraulic components, no leakages
- > Possible use of over 40 KNIPEX crimping dies and locators as well as more than 1000 special crimping dies from the proven Crimp System Pliers (97 43 200)
- > Ergonomically optimised, user-friendly working height during workshop operation
- > LED working light for targeted illumination of the crimping area
- > Low noise level
- > Long servicing intervals (up to 25,000 crimping actions)! The KNIPEX eCrimp is designed to only require servicing after 25,000 crimping actions. This means the intervals between servicing the electromechanical crimping pliers is 2.5 : 1 in relation to conventionally actuated crimping pliers. The pliers are therefore available for crimping use for considerably longer. They do not need to be sent away frequently for servicing. High availability without downtimes while being serviced.
- > Powerful li-ion rechargeable battery (12 V; 1.5 Ah; 18 Wh); charge time approx. 30 min; no memory effect
- > Tether attachment point to prevent falling during field work
- > Max. pressing force of the jaws approx. 11 kN
- > Approx. 170 operating cycles for plug-in connectors with 10 mm² nominal size with a single battery charge

97 43 E

- > With euro plug

97 43 E AUS

- > With plug adapter for AS/NSZ 3112 (AUS+NZ)

97 43 E UK

- > With plug adapter for BS 5733 (GB)

97 43 E US

- > With plug NEMA 1-15P (USA / Canada / Mexico)

97 43 E

The KNIPEX eCrimp is the first electromechanically actuated model of crimping pliers in the world. The possible use of over 40 KNIPEX crimping dies and locators as well as more than 1,000 special crimping dies from the proven Crimp System Pliers (97 43 200). Its universal application range makes it an essential tool in the workshop and for rough field work.

Crimping Pliers for Western plugs

- > Professional tool for cutting and stripping unshielded ribbon telephone cables
- > For crimping 6- and 8-pole Western plugs type RJ 11/12 (9.65 mm width) and type RJ 45 (11.68 mm width)
- > Precise crimping process thanks to parallel crimping
- > Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > With length cutter and stripping knife for ribbon cables 6 and 12 mm length
- > With additional stripping device for round cables
- > Optimum transmission of force due to lever action for fatigue-reduced operation
- > For Western plug type RJ 10 (7.65 mm wide), RJ 11/12 (9.65 mm wide) and RJ 45 (11.68 mm wide)
- > Head burnished, two-colour dual component handles
- > Chrome vanadium electric steel in special quality, oil-hardened

Crimping Pliers

also for two-hand operation

- > For solder-free electrical connections
- > The ingenious lever transmission reduces the handforce up to 30 % compared with regular crimping pliers
- > Consistently high crimping quality thanks to precision dies and forced locking mechanism (unlockable)
- > Crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- > Two-hand operation for easy crimping of large conductor diameters
- > Easy handling as a result of well balanced centre of gravity, angled head and ergonomically shaped handles
- > Chrome vanadium electric steel in special quality, oil-hardened

First step: move the handle with two fingers only until both jaws touch the connector to be crimped

Second step: now use the whole hand for further crimping procedure

Third step: when greater hand force is required, such as e.g. when crimping insulated connectors 6.0 mm², two-hand operation is possible by the longer handles

Universal Locator

Turned contacts are used for particularly demanding plug-type connections, e.g. in medical industry and aeronautics. Extremely reliable crimping connections can be achieved only with pliers that work with absolute precision and maintain the required crimping depth in the 1/100 mm range.

Standard locator

Multi-functional digital display, adjustment in mm, inch or comparable selection positions according to MIL

Self-Adjusting Crimping Pliers for wire ferrules

with lateral access

► Narrow handle width and improved ergonomics

- > For crimping wire ferrules according to DIN 46228 parts 1 + 4
- > Self-adjustment to the size of wire ferrules required
- > Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > Tools have been set precisely (calibrated) in the factory
- > Optimum transmission of force thanks to toggle lever for fatigue-reduced operation
- > Handy shape and low weight provide high operation comfort
- > Chrome vanadium electric steel in special quality, oil-hardened

Crimping capacity can be switched over simply from 10 mm² to 16 mm².

The small crimping pliers for wire end sleeves with two major advantages for the user:

- > Automatic adjustment to the end sleeves used: This makes work easier for the professional and offers reliable and fast crimping
- > Expanded range of applications

KNIPEX Twistor16®

Self-Adjusting Crimping Pliers for wire ferrules with rotatable die head

- > Self-adjusting crimping pliers for wire ferrules with rotatable crimp head
- > Crimp head can be freely rotated 360°, with 8 locking positions
- > Square crimp profile, high capacity range from 0.14 to 16 mm²
- > Wire ferrules can be crimped from almost any working position
- > Crimping pliers adjust automatically to different cross-sections
- > Crimp opening accessible from both sides, extra-long wire ferrules can be fed in
- > Crimping of Twin wire ferrules up to 2 x 6 mm² possible
- > Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > Light and handy tool, manual force reinforced by toggle lever mechanism
- > Chrome vanadium electric steel in special quality, oil-hardened

97 53 18

Crimp head can be freely rotated 360°

Crimp head can be rotated 360° for optimal accessibility, even in confined spaces

97 90 13

All-round care-free solution: KNIPEX Twistor16® with accessories in the practical TANOS MINI-systainer®

Twin wire ferrules up to 2 x 6 mm² can be crimped without adjustment

Uniquely flexible: connectors can be inserted in the rotatable crimp head from almost any position

Self-Adjusting Crimping Pliers for wire ferrules

with front loading

- > For crimping wire ferrules according to DIN 46228 parts 1 + 4
- > Self-adjusting adaptation to the desired wire ferrule size: no wrong crimps caused by using the wrong die
- > Frontal insertion of the wire ferrules into the pliers
- > Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- > Crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- > Optimum transmission of force thanks to toggle lever for fatigue-reduced operation
- > Handy shape and low weight provide high operation comfort
- > Chrome vanadium electric steel in special quality, oil-hardened

97 53 08

- > Compression from 0.08 - 10.0 mm² in one profile; wire end sleeves up to 2.5 mm² can also be loaded parallelly from the side; suitable in particular for all twin wire end sleeves up to 2 x 4 mm² or 2 x AWG 10

97 53 09

- > Compression from 0.08 - 10.0 and 16.0 mm² in one profile; with selector lever for setting the crimping area either to 0.08 - 10 mm² or 16 mm²; suitable in particular for all twin wire end sleeves up to 2 x 6 mm² or 2 x AWG 8

97 53 08

97 53 09

97 53 08: lateral loading of wire ferrules up to 2.5 mm² parallelly from the side e.g. in confined areas

Front loading of wire ferrules e.g. in switchboards

Square-Crimp

The crimping pliers for end sleeves (ferrules) with three great advantages for the user:

- > Automatic self-adjustment to the wire end sleeve used: this allows the specialist to work with less strain and enables secure, reliable and quick crimping.
- > Range of applications also for large cross-sections: square crimping 0.08 to 10 + 16 mm²
- > Front loading: very helpful under difficult working conditions in confined areas.

Crimping Pliers for micro plugs

parallel crimping

- > Parallel crimping performance to satisfy the particularly high standards of small connectors
- > Consistently high crimping quality thanks to precision dies and forced locking mechanism (unlockable)
- > Crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- > Optimum transmission of force thanks to toggle lever for fatigue-reduced operation
- > Crimping pliers for other mini plugs such as HD 22, Modu IV, Micro Timer, MQS ... on request
- > Chrome vanadium electric steel in special quality, oil-hardened

Crimping Pliers for wire ferrules

with trapezoid crimp

- > For crimping wire ferrules according to DIN 46228 parts 1 + 4 in the range from 0.25 up to 2.5 mm²
- > Crimping in marked trapezoidal dies for reliable connections between the sleeve and the conductor
- > Vanadium electric steel; forged, oil-hardened

Crimping Pliers for wire ferrules

with mandrel crimp

- ▶ Light and slim design
- ▶ Also as VDE version
- ▶ Easy crimping due to optimised transmission ratio

- > For crimping wire ferrules according to DIN 46228 parts 1 + 4 from 0.25 to 16 mm²
- > Crimping in marked half-round dies for reliable connections between the sleeve and the conductor
- > 9 particularly deep dies with conical side faces
- > Special tool steel, forged, oil-hardened

Testing dielectric strength, subjecting each pair of pliers to a load of 10,000 V AC.

Insulated tools are a matter of trust

Professionals trust their tools. This trust is vital when working on electrical installations. In this case, the electrician holding the pliers is also holding his life in his hands. Our insulated tools therefore not only meet statutory requirements, but also offer the greatest possible safety, reliability and performance.

Testing the adhesion of the insulating coating at 500 N.

Pressure test at 70°C.

Low temperature impact test at -25°C.

Testing the electrical insulating properties.

Regulated by standards

Only trained professionals are allowed to work on live installations. Such work is subject to strict occupational health and safety standards such as the German DIN VDE 0105 and the international EN 50110 and IEC 60364. In each case they must deploy special tools that have been specifically manufactured and tested for this work. Which requirements have to be met by tools used in live work is determined by DIN EN / IEC 60900. KNIPEX tools which bear the special mark **⚡ 1000 V** are approved for work up to 1000 V AC.

Guaranteed individually checked

Every insulated tool undergoes, one by one, a dielectric strength at 10,000 V AC before we sell it. This means that work in the area up to 1,000 V AC has a safety buffer of ten times the permitted maximum limit. Other procedures check the reliability of the insulation towards heat, cold, tensile and impact force. In addition to the KNIPEX quality assurance team, external institutes and test centres such as the VDE guarantee that all VDE criteria have been satisfied. We go through this effort to safeguard the user. He trusts his well-being with our pliers, day in and day out. In return we want to give him the best possible safety at all times. We stand by this responsibility with our name on the insulation of KNIPEX tools.

Strong beneath the insulation

The insulation provides safety when handling electrical installations, but it does not cut, grip or crimp. The mechanical properties of the basic tool, such as cutting performance, precision and stability, therefore style part of the overall quality of insulated tools.

With our insulated pliers, users can depend on the quality and durability of products from KNIPEX production. For assembly tools insulated by us, we use basic tools from tried and tested suppliers whose quality we subject to regular, stringent checks. The expert can rely on this double dependability of tool and insulation.

Always comply with the currently valid regulations and observe the SAFETY INSTRUCTIONS given below:

- > Insulated tools must be transported in a manner that will prevent any damage to the insulation.
- > Check before every use whether the insulation is damaged in any way, defective tools must be discarded.
- > Always keep your insulated tools clean and dry.
- > Wear protective goggles when working with cutting nippers or working overhead.
- > Always wear goggles or a facial mask when working on live equipment.
- > Make sure the workplace is clean and orderly, particularly when you are working on live installations.
- > Wear protective clothing and use SAFETY equipment (e.g. insulating gloves, insulating mats, protective covers) especially in confined working spaces.
- > Use only a tool with suitable dimensions. That will prevent slipping on the workpiece and unintentional contact with non-insulated parts.
- > Make sure that detached parts or cut-off ends of conductors do not fall onto live parts.

Combination Pliers

Chrome Vanadium

- > For heavy duty
- > With gripping zones for flat and round material, suitable for versatile use
- > With cutting edges for soft, hard and piano wire
- > Long cutting edges for thicker cables
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- > Particularly wear resistant gripping jaws; hardness of the gripping jaws approx. 53 HRC
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened
- > DIN ISO 5746, DIN EN 60900, IEC 60900

High Leverage Combination Pliers

- ▶ 35 % less effort required than with conventional combination pliers
- ▶ With cutting edges (hardness approx. 63 HRC) for heavy duty
- > Easier work due to optimised leverage
- > Easier cutting, powerful gripping, bending and pulling
- > Long cutting edges for thicker cables
- > With gripping zones for flat and round material, suitable for versatile use
- > Cutter head: special high-grade tool steel, forged, oil-hardened
- > DIN ISO 5746, DIN EN 60900, IEC 60900

Needle-Nose Combination Pliers

Small High Leverage Combination Pliers with pointed jaw. For all common installation and repair work.

- ▶ Handy use when working in confined areas thanks to slim head design and pointed jaws (anti-twist)
 - ▶ Gripping surfaces with special convex contour on one side for secure gripping of flat parts
 - ▶ Milled groove in the gripping area permits small parts such as nails, pins and bolts to be held and pulled
- > The reliable and diverse combination pliers when out and about
 - > Easy cutting thanks to the high leverage joint
 - > With cutting edges for soft, medium-hard and hard wire
 - > Long service life and stable tips
 - > Forged from special high grade tool steel, manifold oil-hardened
 - > DIN ISO 5746, DIN EN 60900, IEC 60900

KNIPEX StriX®

Insulation strippers with Cable Shears – two essential electrical installation tools in one pair of pliers

- > Integrated Cable Shears for the clean cutting of Cu and Al cables without crushing
- > Universal adjustment of the wire stripping blades by means of a knurled screw
- > Slim design for good accessibility
- > For stripping single, multiple and fine stranded conductors with plastic and rubber insulation up to a max. Ø 5 mm or resp. 10 mm² conductor cross-section
- > Graduated jaw provides a visual orientation aid when stripping wire in standard lengths (11 mm and 16 mm)
- > Special high grade tool steel that has been oil-hardened in multiple stages

13 66 180 T*

- > Pliers with tether attachment point for mounting a fall protection

13 66 180

13 66 180 T

Induction hardened precision blade

Length marking: visual markings provide support during repeated stripping of wire in standard lengths (11 and 16 mm)

Induction hardened shear blade with precisely ground cutting edges for crushing-free cutting of copper cables up to Ø 15 mm (5 x 2.5 mm²)

Lock nut prevents any unintentional adjustment

Stripping Pliers

Multifunctional – cutting and stripping with one pair of pliers

- ▶ For time-saving stripping of all round sheathed and damp-proof installation cables (e.g. NYM cable)
 - ▶ Simplified access especially into deep mounted junction boxes thanks to slim head design and optimally angled cable sheath cutter
 - ▶ Strip cables easily and without damage thanks to circular cutting edge with depth limiter
- > Suitable for universal use: precision wire stripping holes for conductors from 1.5 and 2.5 mm²
- > With side cutters for cutting and trimming conductors, wires, small screws and nails
- > All cutters additionally induction-hardened to approx. 61 HRC for high wear resistance
- > 30 % lighter than comparable pliers

Pliers for Electrical Installation

The all-rounder for professionals

- ▶ 6 functions in one pair of pliers
- ▶ Multifunctional pliers for the electrical installation; to grip flat and round material, for bending, deburring, cutting cable, stripping and crimping wire ferrules
- > Smooth surfaces near the tips grip single cores without damaging them; serrated gripping surfaces and pipe grip for gripping flat and round material
- > Clear-cut outside edge on the jaw for working on flush-mounted junction boxes and deburring feed-through holes
- > Stripping holes for conductors of 0.75 - 1.5 mm² and 2.5 mm²
- > Crimping die for wire ferrules 0.5 - 2.5 mm²
- > Cable shears with (induction-hardened) precision cutting edges for copper and aluminium cables up to 5 x 2.5 mm² / dia. 15 mm
- > Slim dimensions for easy access
- > Bolted joint: precise, zero backlash operation of pliers
- > High-grade special tool steel, forged, multi stage oil-hardened
- > DIN EN 60900, IEC 60900

13 86 200

13 96 200

13 96 200 T

13 96 200

- > In case of models with opening spring integrated in the joint, the activated locking lever keeps the cutting edges closed while other functions remain active; the intelligent latching mechanism enables you to "grip" without opening the pliers. The cutting edge remains closed and protected

KNIPEX X-Cut®

Compact Diagonal Cutters

high lever transmission

- ▶ Cuts finest strands as well as multi-core cables and piano wires
- ▶ Powerful, light and universal
- > High cutting performance with minimum effort due to optimum co-ordination of the cutting edge angle and transmission ratio
- > Box-joint design: highest stability with low weight
- > Doubly supported joint axis for heavy duty
- > Large opening width for thicker cables
- > Cuts precisely, even through fine copper wires
- > Compact, low-weight construction
- > Universally usable, in the assembly, maintenance and production
- > 40 % less force required compared with standard diagonal cutters of the same length
- > Chrome vanadium heavy-duty steel, forged, multi stage oil-hardened
- > DIN ISO 5749, DIN EN 60900, IEC 60900

Pliers Wrenches

Pliers and a wrench in a single tool

- ▶ Replaces the need for sets of metric and imperial spanners
 - ▶ Smooth jaws for damage free installation of plated fittings – working directly on chrome!
 - ▶ Practical adjustment scale: A laser-cut (metric and imperial) enables pre-setting to the width across flats
- > Also excellent for gripping, holding, pressing and bending workpieces
 - > Zero backlash jaw pressure prevents damage to edges of sensitive components
 - > Fast adjustment by pushing a button directly on the workpiece
 - > No unintentional shift of the gripping jaws and no slipping of the joint
 - > Parallel jaws give a more solid grip; its design allows flexible adjustment of all widths up to the specified maximum size
 - > The ratchet type principle allows quick and easy tightening and release of all bolted connections
 - > Lever transmission greater than 10 : 1 for strong gripping power
 - > Chrome vanadium electric steel, forged, oil-hardened
 - > DIN EN 60900, IEC 60900

Cable Shears

with twin cutting edge

- > For cutting copper and aluminium cables
- > Not suitable for steel wire and hard drawn copper conductors
- > Precision-ground, hardened blades
- > Clean and smooth cut without crushing and deformation
- > Adjustable bolted joint, self-retaining screw
- > Low handforce required due to favourable lever ratio and special blade geometry
- > Pinch guard prevents operators' fingers being pinched
- > By dividing the cutting actions into initial cut (insulating sheath in the front cutting area) and final cut (conductor in the back cutting area), cables up to Ø 20 mm can be cut in one-hand operation
- > High-grade special tool steel, forged, oil-hardened
- > DIN EN 60900, IEC 60900

95 16 200

Initial cut: using the front cutting edge to cut the insulating sheath on larger cable diameters leaves an ergonomic handle opening width.

Final cut: after cutting the sheath in the front profile the conductors in the rear part are cut. Initial cut in the front profile, final cut in the rear profile – to keep it as easy as possible.

Cable Shears

for two-hand operation

- > For cutting copper and aluminium single conductors as well as multiple stranded cables
- > Not suitable for steel wire and wire ropes
- > Precision-ground, hardened blades
- > Clean and smooth cut without crushing and deformation
- > Favourable lever ratio due to toggle lever
- > Pinch guard prevents operators' fingers being pinched
- > Adjustable bolted joint
- > Bolted cutter head, replaceable
- > Handles: steel tube
- > Cutter head: high-grade chrome vanadium electric steel, forged, oil-hardened
- > DIN EN 60900, IEC 60900

95 29 600	021803	Spare cutter head for 95 21 600 / 95 27 600							

Cable Cutters

(ratchet action)

- > For cutting copper and aluminium single conductors as well as multiple stranded cables
- > Not suitable for steel wire and wire ropes
- > Precision-ground, hardened blades
- > Clean and smooth cut without crushing and deformation
- > One-hand operation using ratchet principle
- > Little handforce required due to very high transmission ratio
- > Two-stage ratchet drive for easy cutting
- > Simple handling as a result of low weight and compact design – can be used even in confined areas
- > Pinch guard prevents operators' fingers being pinched
- > High-grade special tool steel, forged, oil-hardened
- > DIN EN 60900, IEC 60900

95 36 280

- > Suitable for aluminium sector cable up to 4 x 150 mm²

95 36 250

95 36 280

Ratchet principle and two-stage ratchet drive for easier cutting

Article No.	EAN 4003773-	↔ mm	1000 V	Tool	Handles	Cutting capacities		MCM	 g
						Ø mm	mm ²		
95 36 250	026884	250	1000 V	black lacquered	insulated with multi-component grips, VDE-tested	32.0	240	500	652

95 39 280	025283	Movable spare blade for 95 31 280 / 95 36 280							

Cable Cutters

(ratchet principle, 3-stage)

- ▶ Sturdy. Easy to use. Stable.
- ▶ Innovative ratchet-drive.
- ▶ For cable up to 60 mm diameter.

- > Fixed handle with support area for putting down the pliers when cutting
- > Easy handling due to low weight (825 g) and compact construction (320 mm length) – also usable in confined areas
- > Cutting through copper and aluminium cables with diameters of up to 60 mm in one-hand and two-hand operation
- > Hardened cutting edges, precisely ground, cut smoothly and neatly without crushing
- > For cutting copper and aluminium single conductors as well as multiple stranded cables (not suitable for steel wire and wire ropes)
- > Innovative three-stage ratchet-drive with high leverage for easy cutting in one-hand and two-hand operation
- > High-grade special tool steel, forged, oil-hardened
- > DIN EN 60900, IEC 60900

Cable Cutters

(ratchet action)

for steel wire armoured cables (SWA cable)

- ▶ Cuts through steel wire armoured cables with a diameter of up to 45 mm / 380 mm² (e.g. 4 x 95 mm²) using one or two-handed operation
- ▶ Sturdy. Easy to use. Stable.

- > Simple handling due to low weight (800 g) and compact design (315 mm length) – can also be used in confined areas
- > Precision-ground blades and induction-hardened cutting edges cut smoothly and neatly without crushing
- > Innovative high leverage three-stage ratchet-drive
- > Support area for putting down the pliers when cutting
- > Not suitable for cutting ACSR cable and wire rope!
- > Cutter head: special high-grade tool steel, forged, oil-hardened
- > IEC 60900, DIN EN 60900

Wire Rope and ACSR-Cable Cutters

Handles: aluminium, high-strength

- > For wire ropes and steel rods, copper and aluminium cables
- > Suitable for cutting overhead cables with strain relief wire (ACSR-cables)
- > Angular cutting blades allow cutting of single rope wire
- > Optimum transmission ratio for high cutting performance
- > Bolted cutter head, replaceable
- > Low weight
- > Handles: aluminium, high-strength
- > Cutter head: high-grade special tool steel, multi stage oil-hardened

KNIPLEX presents high-quality and sturdy plastic pliers featuring protection against bridging for working on live parts up to AC 1000V and DC 1500V. These solid plastic pliers do not act on magnetic fields either and they are fully spark-free. They are also excellent for use in chemically aggressive environments.

Compact Tool Case

26 parts

► With insulated tools for works on electrical installations

- > Shock-resistant plastic case
- > Foam insert with precise recesses for holding the pliers
- > Equipped with a range of customary insulated KNIPEX tools for work on electrical systems
- > Fixable partition wall
- > Dimensions, exterior (W x H x D): 440 x 105 x 385 mm

Electronic Super Knips®

- > Precision pliers for ultra fine cutting work, e. g. in electronics and fine mechanics
- > Ground, very sharp cutting edges without bevel
- > Precision shaped tips cut wires flush to a surface from $\varnothing 0.2$ mm.
- > Shear cut with controlled micro cutting edge misalignment for the most precise cutting of even the thinnest of wires and for a long service life
- > Joint with stainless steel rivet
- > Extremely smooth movement for minimum operator fatigue
- > With opening spring and opening limiter
- > Electrically discharging handles - dissipative
- > DIN ISO 9654

78 03 125/ESD / 78 23 125

- > INOX tool steel; cutting edge hardness approx. 54 HRC

78 13 125/ESD

- > INOX tool steel; cutting edge hardness approx. 54 HRC; with lead catcher – no uncontrolled loss of cut wire ends

78 31 125

- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 60 HRC; with narrow head; special tool steel, burnished

78 41 125

- > With lead catcher - no uncontrolled loss of cut wire ends; with narrow head; cutting edges additionally induction-hardened, cutting edge hardness approx. 60 HRC; special tool steel, burnished

78 61 125/ESD

- > Also suitable for cutting glass fibre cables (fibre optics); cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC; Special tool steel, oil hardened in multiple stages

78 71 125/ESD

Precision Electronics Diagonal Cutters

- > Precision pliers for ultra fine cutting work, e. g. in electronics and fine mechanics
- > Very precisely ground and sharp cutting edges with very small bevels for exact cutting on delicate electronic components; also available without bevel for flush cutting
- > Cutting edges additionally induction-hardened, cutting edge hardness approx. 64 HRC
- > Approx. 20 % lighter than conventional electronics pliers
- > Bolted joint with carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- > Smooth-running double spring for a gentle and even opening
- > Ergonomically optimised multi-component handles
- > Ball bearing chrome steel, forged, multi stage oil-hardened
- > DIN ISO 9654

79 02 120 / 79 22 120

- > Mini-head

79 12 125

- > Specially for cutting through hard wire and piano wire

79 32 125 / 79 42 125

- > Pointed head

79 42 125 Z

- > For an optimised flush cutting result of soft materials

79 52 125 / 79 62 125

- > Pointed head; with lead catcher – no uncontrolled loss of cut wire ends

Material catcher for 79 02 / 22 125 ESD see page 142

The subtle difference

KNIPEX precision electronics pliers are made of high-quality ball bearing steel and processed with the highest degree of care. Each opening movement is gentle and even without backlash. Each work step proceeds reliably and precisely. This makes work much easier for professionals.

Electronics Diagonal Cutters

with box joint

- > For fine cutting work, e.g. in electronics and fine mechanics
- > Load-optimised for a more direct feel when working
- > Low-friction double spring for gentle and even opening
- > The mirror polish together with a fine film of oil offer effective rust protection – no circuit faults caused by peeling chrome from plated tools
- > Cutters additionally laser hardened, cutter hardness at least 60 HRC
- > Narrow sleeves pulled up to the head of the pliers enable the tool to be guided securely and comfortably, also between thumb and index finger
- > Sturdy, zero-backlash box joint
- > Ball bearing chrome steel, oil-hardened
- > DIN ISO 9654

77 01 115 / 77 02 130

Electronics Diagonal Cutters ESD

- > For fine cutting work, e.g. in electronics and fine mechanics
- > Electrically discharging handles – dissipative
- > Sturdy, zero-backlash box joint
- > Low-friction double spring for gentle and even opening
- > The mirror polish together with a fine film of oil offer effective rust protection – no circuit faults caused by peeling chrome from plated tools
- > Cutters additionally laser hardened, cutting edge hardness approx. 62 HRC
- > With two-colour dual component grips, black/grey
- > Ball bearing chrome steel, oil-hardened
- > DIN ISO 9654, DIN EN 61 340-5

Electronics Diagonal Cutter

with inserted carbide metal cutting edges

- > For extreme demands on cutting pliers caused by hard or tough materials, e.g. piano, nickel, tungsten and diode wire, such as those used more frequently in the electronics and aerospace industries
- > Always the right cutting tool, even with the hardest material
- > Precision carbide metal cutting edges soldered into forged blanks
- > Sturdy, zero-backlash box joint
- > Hardness of the carbide cutting edges 80 - 83 HRC
- > Pliers with carbide metal cutting edges have a substantially longer service life than such with conventional cutting edges
- > Constantly reliable cutting results due to the avoidance of cutter deformations
- > High cost saving due to longer service life of the pliers
- > DIN ISO 9654

Precision Electronics Gripping Pliers

- > The assortment for highest standard of performance and results
- > Precision pliers for fine assembly work, e.g. in electronics and fine mechanics
- > For gripping, holding and bending
- > Bolted joint: precise, zero backlash operation of pliers
- > Precisely finished joint surfaces for smooth, low friction movement along the complete opening range
- > Low-friction double spring for gentle and even opening
- > Smooth ground gripping surfaces, edges carefully deburred
- > Non-reflective finish
- > Low weight
- > For very precise assembly work, e.g. in electronics and fine mechanics
- > Smoothly ground gripping surfaces, edges finely rounded
- > Approx. 20 % lighter than conventional electronics pliers
- > Bolted joint and carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- > Smooth-running double spring for a gentle and even opening
- > With precision laser cut cross-shaping
- > Ball bearing chrome steel, forged, multi stage oil-hardened
- > DIN ISO 9655

Electronics Pliers Sets

with tools for work on electronic components

> Dimensions, closed (W x H x D): 215 x 160 x 50 mm

00 20 16

> 7 parts, contains 6 electronics pliers and one pair of precision tweezers; case made of hard-wearing polyester fabric, pliers are held by elastic band, zippered

00 20 16

00 20 16 P

00 20 16 P

> 6 parts, contains 6 precision electronics pliers; case made of hard-wearing polyester fabric, pliers are held by elastic band, zippered

00 20 16 P ESD

> 6 parts, contains 6 ESD precision electronics pliers, electrically discharging version; case made of hard-wearing polyester fabric, pliers are held by elastic band, zippered

00 20 17

* SMD-Technology: technique for soldering surface mounted components on printed circuit boards without using holes

Pliers with tether attachment point for mounting a fall protection

Pliers range with tether attachment point
for mounting a fall protection

266

The tether attachment point for the range with multi-component handles

Tools can fall down when used on cherry pickers, scaffolding and ladders and when used by industrial climbers working with wire rope hoists.

KNIPEX offers a range of pliers and accessories that can reliably prevent the KNIPEX pliers from falling down.

There is a very stable tether on the inside of the handles which is welded tightly to the handle for attaching the tether or adapter strap. The lug enables the equipment to be attached and put down quickly. The sophisticated elements from our KNIPEX Tethered Tools Program offer several individual permutations for connection and use.

Tether attachment: dynamic load capacity for a max. fall height of 3 m / 10 ft by a tool from the KNIPEX TT range (or static load with max. 400 N / 90 lb).

Tool Roll

Essential for work on electrical systems: 15-piece basic tool kit in practical roll-up bag

- > Tool roll made of hard-wearing polyester fabric
- > With practical, adjustable quick release fastener
- > Equipped with a range of insulated KNIPEX tools for works on electrical installations
- > Dimensions, open (L x H): 830 x 310 mm

Tool Roll

Handy, ideally equipped: 11-piece set of tools for telecommunications and electrical engineers

- > For telecommunications and electrical engineers
- > Tool roll made of hard-wearing polyester fabric
- > With practical, adjustable quick release fastener
- > Contains eight pliers and three screwdrivers
- > Pliers with chrome-plated heads and two-colour multi-component handles
- > Screwdrivers VDE-tested according to DIN EN/IEC 60900 1000V
- > Dimensions, open (L x H): 450 x 290 mm

Mini pliers set

Our unbeatable duo, even when you're on the move: handy-sized cutting, gripping and screwing tools

► For gripping, holding and cutting tasks, both large and small

- > KNIPEX Mini Cobra®: the high tech water pump pliers – adjustment directly on the workpiece at the press of a button; with fine adjustment for optimum adaptation to different workpiece sizes up to Ø 27 mm
- > Needle-nose combination pliers: ideal for working in hard-to-reach places thanks to the slender head shape with powerful, pointed jaws; with cutting edges for soft, medium hard and hard wire up to Ø 2 mm

KNIPEX Cobra®: with fine adjustment directly on the workpiece

Needle-Nose Combination Pliers: the convex gripping surface on one side makes this the ideal tool for gripping flat parts

00 19 72 LE	070191			Belt pouch for two pliers up to 160 mm length, empty		65

Cable tie cutting set

Safety first: remove the cable tie without damaging the insulation

► For reliable removal of cable harnesses, e.g. in the aerospace industry

- > Pliers wrench with special laser shearing for a good hold: grip, compress or loosen the head of the cable tie, all without cutting it
- > Precision electronics diagonal cutter with rounded pliers head: for low-risk cutting of cable ties in confined spaces or when the cable tie head cannot be held; also suitable for cutting hard wires up to Ø 0.7 mm

The cable tie can be safely gripped and compressed with the laser-tooled jaws

All edges on the pliers head are specially rounded – unintentional damage to the insulation is avoided

"BIG Twin"

Everything at a glance

The design for the "BIG Twin" series

Can be opened on both sides,
generous storage space with
numerous tool pockets

Three-digit combination lock

Label field with two stickers
for individual labelling

Large KNIPEX logo
on the cover

Two metal flip locks

Two deposit recesses
in the case cover

"BIG Twin Move" additionally with trolley function

Smooth-running
skater wheels

Extendable telescopic
handle

Tool Case "BIG Twin Move"

For quick access: everything at a glance, even on the move

- ▶ Telescopic handle set in the base as well as two external, smooth-running skater wheels
 - ▶ Free-standing in all opening positions thanks to snap-in cover holders with hinge mechanism on both sides, angle freely adjustable
 - ▶ Can be opened from one or both sides; bottom and lid can be opened independently of each other
 - ▶ Label field with two stickers for individual labelling
 - ▶ Max. payload: 30 kg
 - ▶ Volume: 44 litres
-
- > Rugged design made of ABS material, black
 - > Circumferential aluminium frame with securely mounted, sturdy centre wall that can be fitted on both sides, with versatile inserting options due to elasticated loops and twelve small pockets
 - > Metal hinges
 - > Three-digit combination lock for secure locking of the case
 - > Two metal flip locks each for fixing the cover and the base
 - > Removable document compartment and removable tool boards made from dirt-repellent PP twin-wall sheets with 13 tool pockets
 - > Base tray, can be fixed by press button, height 58 mm, can be subdivided by flexible inserts; cover plate with 13 large compartments
 - > With a total of 95 inserting options

Everything at hand thanks to intelligent layout

"Robust"

Optimum tool transport even under the toughest conditions

Tool Case "Robust"

The name says it all: ideal for outdoor use

► For the toughest conditions: Dust-tight, waterproof and temperature-resistant

- > Fit-to-fly case, made from impact-resistant polypropylene
- > Dustproof and watertight
- > Air pressure compensation valve
- > Temperature-resistant from -30°C until + 80°C
- > Padlock eyelets
- > Document compartment; tool boards made from dirt-repellent PP twin-wall sheets with tool pockets and straps
- > Lockable base tray can be individually divided using aluminium separator system
- > Ergonomic dual-component handle

Pressure valve for venting and name plate for individual labelling

Document compartment

Device for securing with a padlock (lock not included)

Aluminium separators for individual division of the base tray

The "Robust" cases compared:

	Number of inserting options	Litre capacity	Max. payload kg	Dimensions base tray mm	Trolley function
"Robust23" 00 21 35 LE 	49	23	25	470 x 370 x 190	—
"Robust34" 00 21 36 LE 	93	34	25	510 x 419 x 215	—
"Robust45 Move" 00 21 37 LE 	147	45	35	609 x 428 x 263	✓

Also suitable as a standing or sitting aid

Case locking via robust flip locks

Secure fastening of the tool board prevents tools from falling out of the base

Tool Case "Robust23" Electro

Small and robust: handy case with tools for professional electricians

- ▶ Equipped with 25 brand tools, partly VDE-tested according to DIN EN 60900
- ▶ Max. payload: 25 kg
- ▶ Volume: 23 litres
- > Document compartment; tool boards made from dirt-repelling twin-wall PP sheets with space for 33 tool pockets and various tool straps
- > With a total of 49 inserting options
- > Base tray with aluminium separators
- > Dimensions, exterior (W x H x D): 470 x 370 x 190 mm
- > Dimensions, interior (W x H x D): 437 x 307 x 172 mm

Tool Case "Vision24" Electro

Well sorted and tidy: the standard tool case with versatile basic equipment

- ▶ Equipped with 20 brand tools, partly VDE-tested according to DIN EN 60900
- ▶ Max. payload: 20 kg
- ▶ Volume: 24 litres
- > Flexible options due to the individual partitioning of the inserts in the 60 mm deep base tray and its cover plate with six large tool compartments
- > Tough ratchet hinges hold the lid open where necessary despite the deadweight of the tools
- > Strong, ergonomic handle, snaps into place at a 90° angle
- > Removable tool board with 15 tool pockets on the base side and six tool pockets as well as a clamp compartment (400 mm wide) on the cover side, held by a push button
- > Two lockable steel flip locks protect the case contents from theft
- > With circumferential double aluminium frame
- > Rugged design made of ABS material, black
- > Cover and tool boards made from dirt-repellent PP twin-wall sheets
- > Dimensions, exterior (W x H x D): 480 x 380 x 180 mm
- > Dimensions, interior (W x H x D): 460 x 310 x 170 mm

Tool bag "Stretched"

Handy, but roomy: the tool bag for long tools

- > Made of hard-wearing polyester fabric
- > For tools up to 450 mm in length
- > With two compartments on the back
- > With carrying handle and adjustable shoulder strap
- > Closing strap made of leather
- > Bag without tools

00 21 07 LE

Article No.	EAN 4003773-	Dimension exterior (interior) width mm	Dimension exterior (interior) height mm	Dimension exterior (interior) depth mm	g
00 21 07 LE	071358	550 (530)	225 (190)	190 (160)	1760

Tool bag "LightPack"

Lightweight and durable, securely locked but quick to open: good for the service vehicle, good for the boot

- > Can be opened from both sides
- > Made from tough polyester fabric, with zip fasteners and hook-and-loop fastener
- > Tool loops inside
- > Plastic base tray
- > Steel handle with softgrip
- > Shoulder strap (can also be used as tool belt)
- > Max. payload: 20 kg
- > Bag without tools

00 21 08 LE

Article No.	EAN 4003773-	Dimension exterior (interior) width mm	Dimension exterior (interior) height mm	Dimension exterior (interior) depth mm	g
00 21 08 LE	077787	480 (450)	380 (310)	300 (260)	2800

Tool bag "Service"

Everything you need: store your tools and notebook safely

- > Lined inside pouch for notebook and DIN A4 documents; also with DIN A4 zipped compartment
- > 90° fold-out front pouch with 8 tool pouches and one small inside pouch
- > Reverse side of the front pouch with 5 tool pouches and 3 pen pouches
- > Removable tool board with 8 tool pouches on the front and 2 rows of elastic loops on the back
- > Splash-water-protected bottom
- > Adjustable shoulder belt with quick-release fastener
- > With two carry loops
- > Made of hard-wearing polyester fabric
- > Bag without tools

00 21 10 LE

Direction and position of the cutting edges

Cutting edge shapes DIN ISO 5742

Joint types

<p>Lap joint</p> <p>With the lap joint, which is used on carpenters' pincers, concretors' nippers and high leverage diagonal cutters, the two halves of the pliers lie on top of each other without being milled out. The pliers handle can thus be designed to be very robust.</p>	
<p>Single joint</p> <p>With the single joint, half the thickness of each pliers handle is milled. Both pliers handles can thus be fitted into one another. The outer sides in the rivet area are smooth and not indented.</p>	
<p>Box joint</p> <p>One handle on the pliers is slit. The other handle is pushed through this slot. This joint connection can withstand a high level of load and strain because the joint bolt is supported on both sides and the inside handle is guided on both sides.</p>	
<p>Slip joint</p> <p>Slip joints enable optimal adaptation of the gripping jaws of pliers to various workpiece sizes. The opening width of the jaws is increased or decreased for this purpose. This occurs through shifting the two pliers handles with respect to one another.</p>	

Safety instruction

- > Each tool should only be used for its specified purpose.
- > When using cutting pliers: beware of wire ends flying off. Wear protective goggles and – if needed – gloves. Be aware of bystanders!
- > Only handles marked with the symbol 1000 V are insulating.

Care instructions

A drop of oil (e.g. WD-40®) on the polished surfaces and in the joint keeps your pliers in good working order and extends their service life!

Basic jaw shapes

Examples of different handle types on a pair of pliers

Straight handles, fully-metal design without plastic grips are used when the hand must be placed at various positions when gripping. This is often the case with carpenters' pliers and concretors' nippers.

S-shaped handles, thin plastic coatings render pliers slip resistant and pleasant to grip. They support a precise hand position, which can be useful in screwing motions, for example. The typical handle for water pump pliers.

Curved handles, thin plastic coatings support the hand at the front and rear. This is always beneficial where high forces are required, for example with diagonal cutters.

Multi-component grips
Compared to handles with a thin plastic coating, comfort handles offer the hand a larger contact surface, enabling better distribution of force and thus making work more comfortable.

VDE*-insulated handles, multi-component grips
Insulated grips for working on electrical systems. Approved to DIN EN/IEC 60900, these pliers comply with significantly more stringent technical and safety standards.

VDE*-insulated handles with dip-insulation
The dipped VDE-handles guarantee the same electrical protection as other VDE insulated handles. In particular, energy companies use these different looking VDE-pliers to help prevent the wrong tool from being used.

ESD-grips, multi-component grips**
Dissipative sleeves enable a gradual, controlled equalisation of any prevailing differences in electric potential between the operator and sensitive electronic components.

Wire classes

	Material examples	Type of wire	Tensile strength		
			N/mm ²	kp/mm ²	
	Copper, plastics	soft	220	22	
	Nail, wire pin	medium-hard	750	75	
	Wire rope strand, steel wire	hard	1800	180	
	Spring steel wire	piano wire	2300	230	

Note

The maximum values always indicate the performance limit under the most favourable cutting conditions, when the wire is placed as near as possible to the joint.

Structure of article number

Example of the item number on the pliers handle

Basic model e. g. KNIPEX Cobra® Hightech Water Pump Pliers	Style e. g. straight	Finish e. g. head polished, handles with multicompo- nent grips	Length e. g. 250 mm	Accessory e. g. Tethered- Tools- Programm
87	0	2	250	T

Safe working: very stable tether attachment, firmly welded to the handle grip for attaching a safety cord or adaptor sling
